WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

KeyValue Software Systems

August 2020 - Present

- Worked in a React Native-based Indonesian D2C SaaS stack, achieving **1M+ Android downloads** and **50K daily users**. Enhanced code quality and efficiency with design patterns and reusable hooks.
- Followed real-time user monitoring practices resulting in crash rates and ANRs significantly below industry benchmarks
- Developed a React Native based Singapore SaaS product concentrated on dental cosmetic treatments.
- Spearheaded development of a Digital Logistics Platform for a UAE fashion conglomerate.
- Developed an internal tool in react facilitating test case management for QA teams across multiple projects.
- Led development of a Flutter application facilitating fee collection for institutions of varying scales.
